Need another reason to use Qwil?

Sleep better at night:

After the big banks, SEC and global regulators are clamping down on unmonitored WhatsApp use for smaller advisers & brokers. Why be next?!

Our customers save on average \$48 per staff member by replacing:

- 📄 Docusign? Qwil has unlimited signatures
- 💬 Slack? Qwil has unlimited chat and clients included
- 📺 Zoom? Qwil has embedded video and screen sharing
- 🔒 Mimecast? Qwil has secure doc sharing and file manager
- 📢 Mail Chimp? Qwil has message broadcast

Close deals faster and improve client satisfaction:

👉 650% faster response time and 4x higher open rate vs email.
Coordinate the whole sales process, inviting the right participants, giving the look and feel of WhatsApp but with the full audit trail!

No training required:

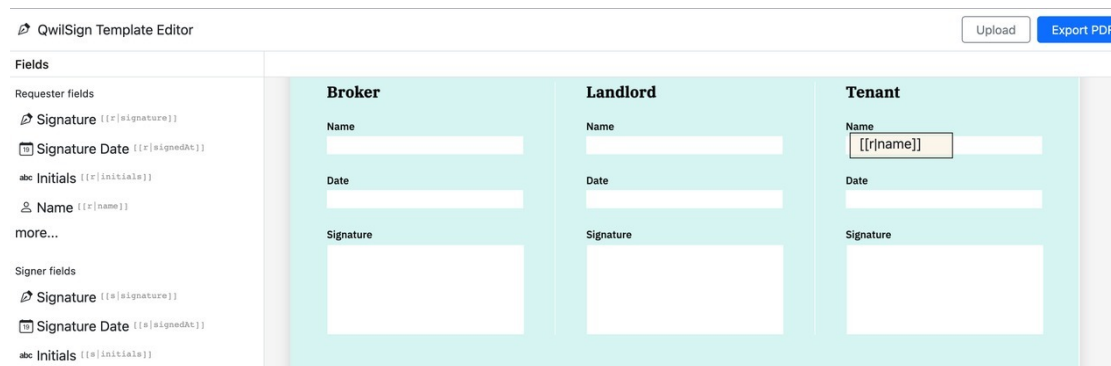

👉 Qwil is banking grade but that doesn't mean you need to be an IT expert to use it. If you and your clients can use WhatsApp, then you can use Qwil. It only takes minutes to setup and we are here to support you!

Focus on e-signature

Unlimited e-signature was already embedded in Qwil and being used for sales contracts, NDAs, forms, employee onboarding...It was as simple as uploading a pdf or creating a template in Acrobat Reader and sending.

But we wanted to make it even easier!

- We built a new online template editor so you can upload a PDF and drag and drop your fields where you need to be

- We added the ability to choose the signature font, draw or even upload
- We added the document preview before sending

Watch out for these features in our next release. You will of course continue to benefit from Advanced Electronic Signatures with the certificate ([learn more](#)), reminders and having everything in the same application!

Discuss your needs

If you prefer Biometrics

Request biometric approval ×

Quickly and securely approve requests and processes with fingerprint and facial recognition!
Once approved, a confirmation will be sent to all parties. [Learn more](#)

SELECT TARGET
Only the user you select will be able to approve your request using biometrics.

Select a participant

ADD A CAPTION
The caption will be sent along with your request.

Message

Every user is verified on Qwil so a "👍" can be deemed as a trade confirmation.

But sometimes you may want that extra level of security, and that's why we have added Biometric approval requests.

In the news

[Consumer Duty - communication is critical](#)

If your staff and clients can easily and securely communicate you are meeting your Consumer Duty requirements.

[SEC fines](#)

SEC is clamping down on unmonitored WhatsApp use and lack of recording. 10 smaller Broker dealers and advisers fined in September. Which sector is next?

[Toggle Tax](#)

4 hours a week wasted switching apps according to a Harvard Research. Time to streamline your single use apps?

[E-signatures - are they all the same?](#)

What makes them legal? Are they all the same? Can I copy & paste a signature? Is the font important?
